DETAILED ACTION

Allowable Subject Matter

Claims 1-26, 28-30, and 32-35 are allowed in view of the Applicant's arguments (Response filed 10/03/2006) and the cited prior art of record. The independent claims recite a transmit-only (and corresponding receive only) apparatus including a protocol stack compatible with a protocol standard for local wireless communication, a transceiver that wirelessly transmits to a second apparatus a synchronization packet at a radio frequency within a predetermined frequency band, the synchronization packet usable to synchronize data transmissions, the transceiver wirelessly transmitting a first data packet to the second apparatus at a predetermined frequency band, the first data packet being associated with a first priority level, and being transmitted after the synchronization packet by a first predetermined offset corresponding to the first priority level, the transceiver transmitting a second data packet to the second apparatus at a radio frequency within the predetermined frequency band, wherein the second data packet is associated with a second priority level, and the second data packet is transmitted after the synchronization packet by a second predetermined offset corresponding to the second priority level, and the first and second predetermined offsets are usable by the second apparatus to determine the respective priority levels of the respective priority levels of the respective data packets, which, in addition to the rest of the claim limitations, are distinguished from the prior art. For support, see Instant Specification (pg 5, 9-13)
